

RODRIGO IVÁN TREJO HERNÁNDEZ

Analytics Engineer & Data Scientist

5560863185 | ldm.rodrego.trejo@gmail.com | Mexico State, North Metropolitan Area | [LinkedIn](#)

PROFILE

Analytics Engineer & Data Scientist with 2+ years of experience building pricing intelligence systems, automating data pipelines, and delivering BI solutions consumed by 40+ companies across FMCG, retail, and CPG industries. Hands-on with Python, AWS (Glue, S3, Athena, Amplify, ECS), and Power BI — from raw data ingestion to executive-facing dashboards. Currently coordinating a cross-regional analytics team and building internal data products including web applications and ML-assisted tools.

HARD SKILLS

- **Programming:** Python (Pandas, PySpark, NumPy, Scikit-learn), SQL, React, MATLAB
- **Cloud & Data Engineering:** AWS (Glue, S3, Athena, IAM, Amplify, ECS), ETL/ELT, ODBC
- **Machine Learning:** Supervised/Unsupervised Learning, Feature Engineering, Data Mining
- **Analytics & BI:** Power BI, DAX, Data Modeling, KPI Dashboard Design
- **Dev & Other:** Git, Streamlit, React, Fuzzy Matching

WORK EXPERIENCE

Data Bunker — Data & Analytics Coordinator

Apr 2025 – Present

- Lead analytics operations for a portfolio of 40+ enterprise clients across FMCG, retail, and CPG — overseeing pricing intelligence dashboards used by RGM, Marketing, and Commercial Directors for strategic decision-making.
- Coordinate a cross-regional team, managing client relationships, analytical scopes, and post-delivery adoption for renewals and retention.
- Design and scale ETL/ELT pipelines on AWS (Glue, Athena, S3, IAM, ODBC) supporting multi-source data ingestion and transformation at 20M–200M row scale.
- Developed a price elasticity and sensitivity dashboard in Power BI + Python, enabling clients to dynamically filter category- and SKU-level demand curves and simulate revenue impact of price changes.
- Built and deployed two internal web applications on AWS Amplify + ECS: a client operations platform centralizing delivery tracking, contracts, and billing; and a product similarity search tool combining fuzzy text matching and visual search for retail catalogue management.

Data Bunker — Data & Analytics Analyst

May 2024 – Apr 2025

- Automated 20+ data processes with Python & AWS, reducing manual work by 1–5 hours per process and increasing data refresh speed for pricing decision systems.
- Engineered Power BI dashboards for pricing strategy, supplier negotiation, and new product launches — processing datasets of 20M–200M records per table across multi-source schemas.
- Delivered ETL/ELT workflows using AWS Glue & PySpark for ingestion and transformation of multi-source datasets.
- Developed front-end components for AI client-facing products using React & AWS Amplify.
- Trained clients on Power BI usage and analytics interpretation to support data-driven decision-making.

PROJECTS

Bonafont (Danone)

Aug 2023 – Nov 2023

- Built a Streamlit application to track and visualize production KPIs (units produced, defects, rejection rates) that had no prior measurement system — enabling structured operational reporting for plant management.

Coppel

May 2022

- Applied combinatorial optimization in Python and Excel to improve last-mile delivery routing — accounting for vehicle capacity, product priority, and driver shift constraints to reduce operational hours.

FEMSA

May 2021

- Performed SKU-level energy consumption analysis across production stages using Python (NumPy, Pandas, Seaborn, Matplotlib) to identify high-cost SKUs and support production profitability decisions.

EDUCATION

Data Science & Mathematics Engineering

Aug 2020 – Jun 2024

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

High School — Bicultural Program

Aug 2017 – Jun 2020

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

CERTIFICATIONS

- [AWS Certified AI Practitioner](#) — Amazon Web Services Mar 2026
- [AWS Technical Accreditation](#) — AWS Partner Network Feb 2026
- [Machine Learning in Power BI](#) — Coursera Aug 2024
- [Advanced Microsoft Power BI](#) — Coursera Jul 2024

LANGUAGES

- Spanish — Native
- English — B2 (Upper Intermediate)
- German — A2 (Elementary)

OTHERS

- Competitive sports: College and High School American Football, ITESM Borregos (2017–2023)
- Leadership: Team captain — ITESM Borregos CEM, championship 2020
- British English Olympics (2016): speaker representative of Mexico
